LANIFICIO PAOLETTI

A/W 2016/2017

Lanificio Paoletti expresses its identity through the tools of his ancient factory, which was founded in 1795.

The professionals in each department work meticulously with materials using both traditional and modern devices, which allow them to spin, weave, mend, sample, and finally ship the fabrics to fashion designers. Displayed by function and colour, the elements of each storyboard illustrate a specific phase of the production cycle and suggest colour combinations chosen for the 2016/2017 Autumn-Winter collection.
